Transfer:
None
Non-Transfer:
None

Certificate(s)
None

Employment Concentration Certificate(s)
Emergency Medical Technician (EMT) 99999 ECC.EMT
Emergency Medical Technician (EMT) Advanced 99999 ECC.EMTADV

EMT
This non-transfer program provides the knowledge and skills required to care for the ill or injured person(s) in the pre-hospital care setting. It is also a first step for those individuals who would prefer to work in an emergency room as an emergency room technician. Students are taught how to perform a complete patient assessment and provide multiple life saving interventions based on their assessment of the ill or injured patient. This course is primarily taken by individuals who intend to work in the field of pre-hospital emergency medicine and with critically ill or injured patients.

This course can also be taken by individuals currently working in a similar medical employment within the medical field and there may be potential for salary and/or career advancement. Individuals who wish to take this course must have a criminal free background due to licensing restrictions imposed by national, state and local licensing agencies. The potential student must be 18 years of age. Hospital clinical and field internship hours are required. This course is a positive attendance course due to national, state and local mandates.

Transfer Preparation
MSJC offers a range of course work to prepare students to transfer to four-year colleges and universities. Courses that fulfill major requirements for an associate degree in this program might not be the same as those required for transfer into the major at a four-year university. All four-year institutions prescribe their own standards for course evaluation and admissions. Prospective transfer students are advised to research careers, degrees and majors in the Career/Transfer Center, access www.assist.org, review the MSJC catalog and meet with a counselor to expedite their transfer plan.

Learning Outcomes
Certified Nursing Assistant

• Perform safe, competent, and therapeutic nursing assistant care to maintain optimum wellness of the client and families.
• Apply basic principles of physical, social, cultural, and spiritual assessment to the nursing assistant care of the client and families.
• Identify and report abnormal physical and social assessment findings to the interdisciplinary patient care team.
• Participate in the plan of care for clients and families in a variety of health care settings.
• Demonstrate effective therapeutic communication and professionalism to clients, families, and other members of the interdisciplinary team.
• Demonstrate ethical, legal and safety standards to clients, families and other members of the interdisciplinary team.
• Prepare to take the CNA NNAAP Test.

Home Health Aide

• Identify State and Federal regulations and requirements for HHA certification.
• Identify members of the home health care team, their functions, and how they interact.

Career Opportunities
All career opportunities listed are representative careers in each field. There are no guaranteed positions for students completing these programs. (See: www.onetonline.org)
