

**February 2017**

**CDEC Security Enhancements - San Jacinto Campus**

The Child Development Education Center (CDEC) Security Enhancements project consists of a combination of both physical building revisions and security equipment installations that will enhance safety and security for the staff and children at both the San Jacinto Campus CDEC facility.

<b>Project Budget:</b>	\$710,000
<b>Funding Source:</b>	Measure AA Bond Funds
<b>Project Status:</b>	DSA Submitted
<b>Architect:</b>	Ruhnau Ruhnau Clarke Architects / Planners
<b>Contractor:</b>	TBD
<b>Estimated Completion:</b>	August 2017

Primary physical building revisions: Modifications will be made to the public entry areas to provide secure, enclosed lobbies. Visitors will have to check in with the reception staff who will be located behind a metal-framed high-strength glass partition wall with a small pass-through window. Entry beyond the secure lobby will not be allowed until after they have been cleared by staff and “buzzed in” past a new secure entry door.

Primary security equipment installations: The main entry doors and all other exterior doors will be fitted with high-tech card readers with access-control lock mechanisms that will be tied into the District’s secure access control system. All exterior entry points and building perimeters will be monitored by high-tech security cameras that can be monitored by CDEC staff and security personnel.
