Economics

The mission of the Economics program is to acquaint students with economic aspects of critical thinking and logical analysis, mathematical concepts and quantitative reasoning through communication and composition, problem-based learning, and the study of business and economic literature.

These skills provide the fundamental foundation for academic and career pathway success. The economics curriculum is designed to equip students with the skills and knowledge of macroeconomics, microeconomics, and environmental economics; as related to politics and history, business and markets, governments and global economies, as well as social and cultural institutions. The Economics pathway program is intended for students who are planning to transfer to a four-year college or for a business occupational area of his/her own choice. Transfer students may earn an Associate degree in Economics for Transfer. This degree pathway is designed to accommodate the differing requirements for a wide variety of transfer institutions and provide a guided pathway to achieve transfer goals and career success.

Associates Degree for Transfer, Economics
