Strategic Data Systems

Strategic Data Systems (SDS) headquartered in San Diego, CA, has been a trusted provider of comprehensive IT and engineering services to the Navy, Marine Corps and Defense Logistics Agency since 1997. SDS has established a solid reputation for innovative, cost-effective solutions and services that meet our customers' objectives and add value to their organizations. We have broad technical capabilities, from assessment and design, to implementation, project management and network operations support.

SDS's innovative technology solutions have a proven track record of improving productivity, reducing costs, and enhancing the way our customers do business. We employ top engineers, technicians and support personnel, ensuring a dynamic and effective solution. SDS consistently scores high in customer satisfaction ratings resulting in repeat business opportunities.
